

Naturescape User Guide

The [Naturescapes](#) project provides an overview of the contributions of different nature-based solutions (NBS) within functional urban areas (FUAs) to address sustainability challenges based on a common set of quantitative and qualitative indicators.

It serves as a simple starting point for understanding individual NBS impacts and for creating an overview of the possible synergies across NBS assemblages (naturescapes) in specific thematic domains or areas.

The database includes the profile of 390 NBS sites over 30 FUAs and it is available both as a stand-alone database here and through the [Urban Nature Atlas](#) where more details are available on the individual NBS.

		Zoom in and zoom out of map.
		Zoom to the default zoom level.
		Toggle basemaps.
		Open application info dialog.
		Open application user guide.
		A map cluster indicating a group of NBS project sites within close proximity.
		Clickable map polygon features of NBS project areas.

Filtering Panel

The diagram illustrates the Filtering Panel interface, which is divided into two main sections: "Filter by Location" and "Filter by Indicator".

Filter by Location:

- Filter** (with an information icon *i*): Close advanced filtering panel.
- Filter by Location** header: Show or hide filter info details.
- Search for a location...** (with a magnifying glass icon): Zoom to an address or location.
- Region(s)** (dropdown menu): NBS projects within selected region(s).
- Functional Urban Area(s) (FUA)** (dropdown menu): NBS projects within selected FUA(s).

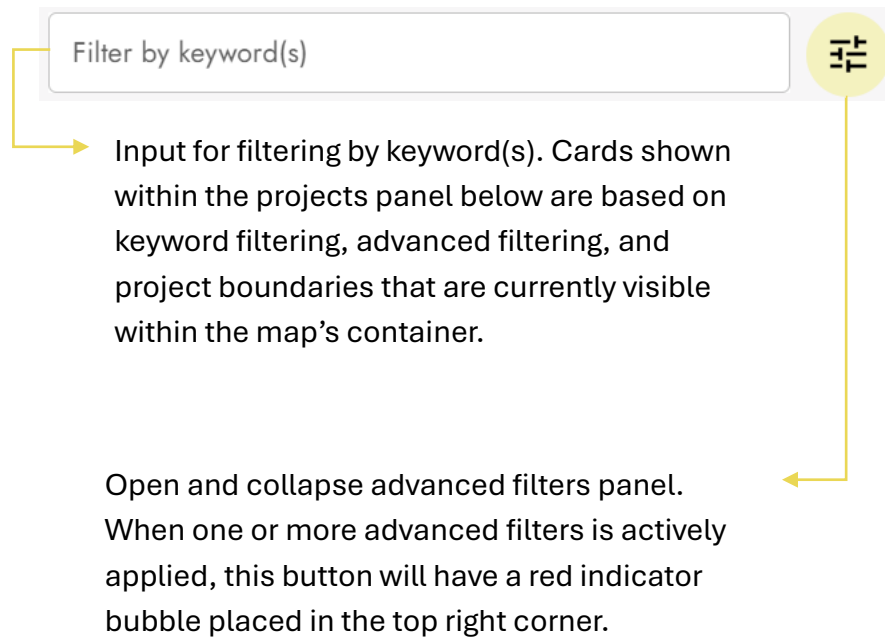

Filter by Indicator:

- Biodiversity** (dropdown menu): Expand indicator filters.
- Climate** (dropdown menu): Expand indicator filters.
- Social Justice** (dropdown menu): Expand indicator filters.
- Transformative Potential** (dropdown menu): Expand indicator filters.
- RESET FILTERS** (button): Reset all filters to default values.

Biodiversity Section (Expanded):

- Biodiversity** (with an expand/collapse icon $\wedge$): Collapse indicator filters.
- Protected Areas** (with an information icon *i*): Indicator value slider.
- Coastal Habitats** (with an information icon *i*): Indicator value slider.
- Fraction of Natural Area** (with an information icon *i*): Indicator value slider.
- NBS Biodiversity-related Ambition and Performance** (with an information icon *i*): Indicator info details.

Keyword Filtering

Getting Started

Exploring and Viewing NBS Projects

1. Enter the application and begin by scrolling and searching through all NBS projects.

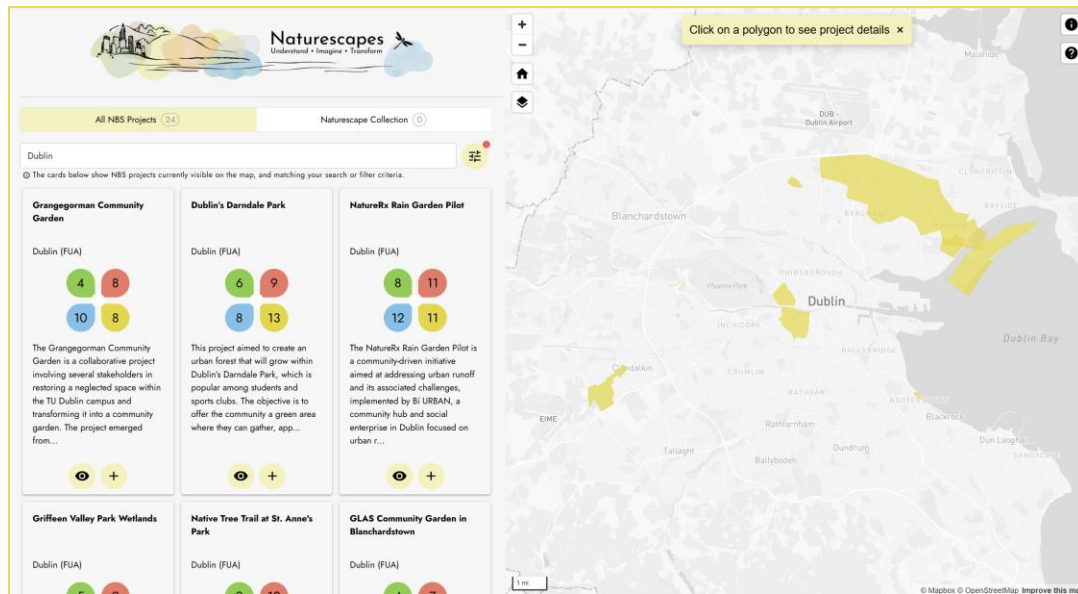

Figure 1: Europe region selected in advanced filters and "Dublin" keyword filter applied.

2. Scroll to desired project and click the view project details button . Alternatively, explore the map and click on the desired project boundary to view project details.

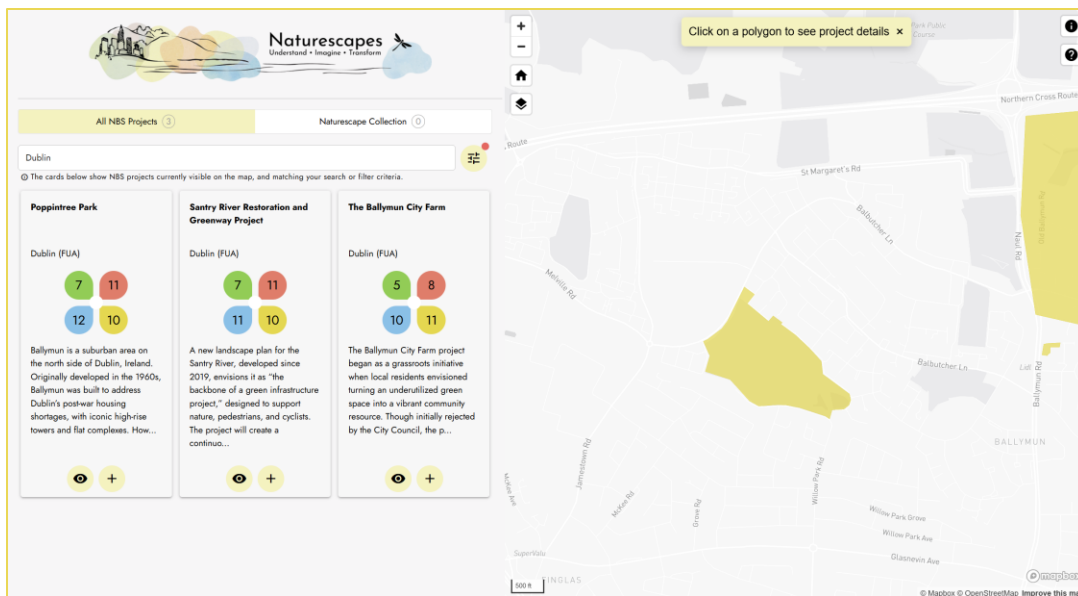

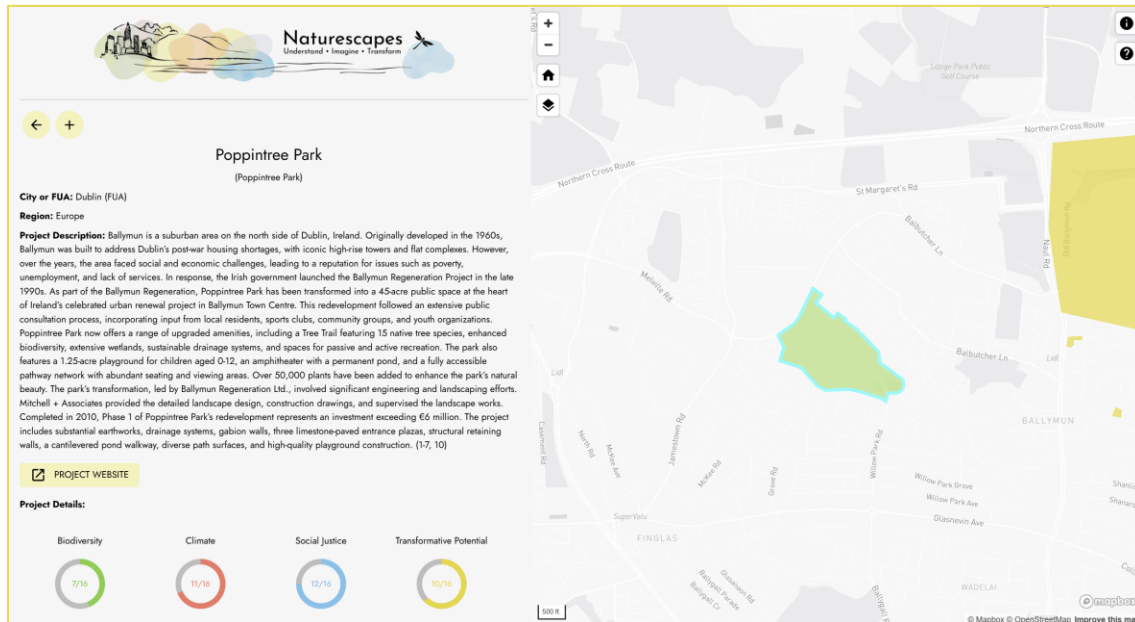

Figure 2: After navigating and exploring the map, the desired project has been located.

3. Once the “View Project Details” button or NBS project boundary are clicked, the project panel displays project details and the project area is highlighted.

Creating and Exporting a Naturescape Collection

1. Enter the application, apply desired filters, and locate NBS projects.

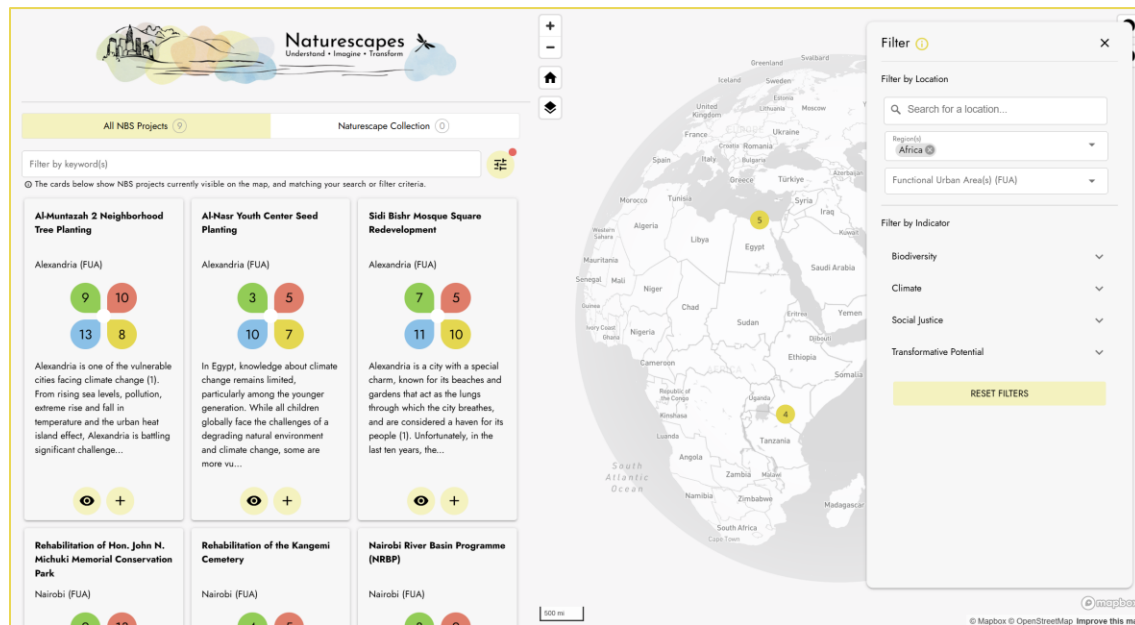

Figure 3: Africa region selected in advanced filters to build an Africa Naturescape Collection.

2. Add desired NBS projects to the Naturescape Collection by clicking the button on the project card or within project details.

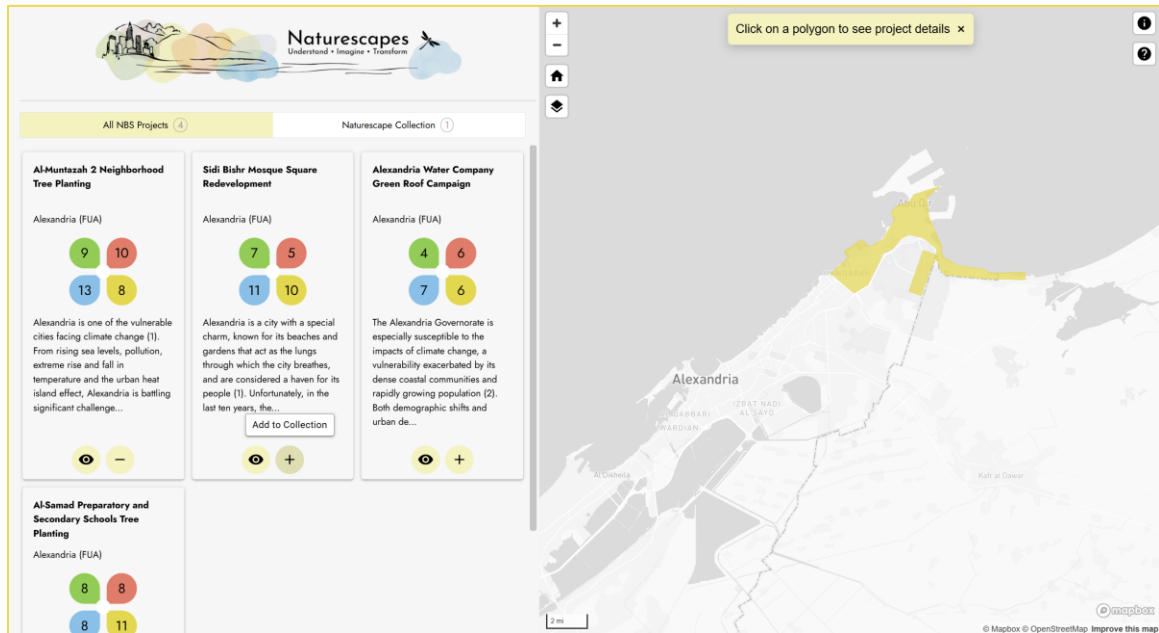

Figure 4: All NBS projects within the Alexandria FUA have been located

3. Once all desired NBS projects have been added to the collection, navigate to the Naturescape Collection Tab to compare, manipulate, and share results.

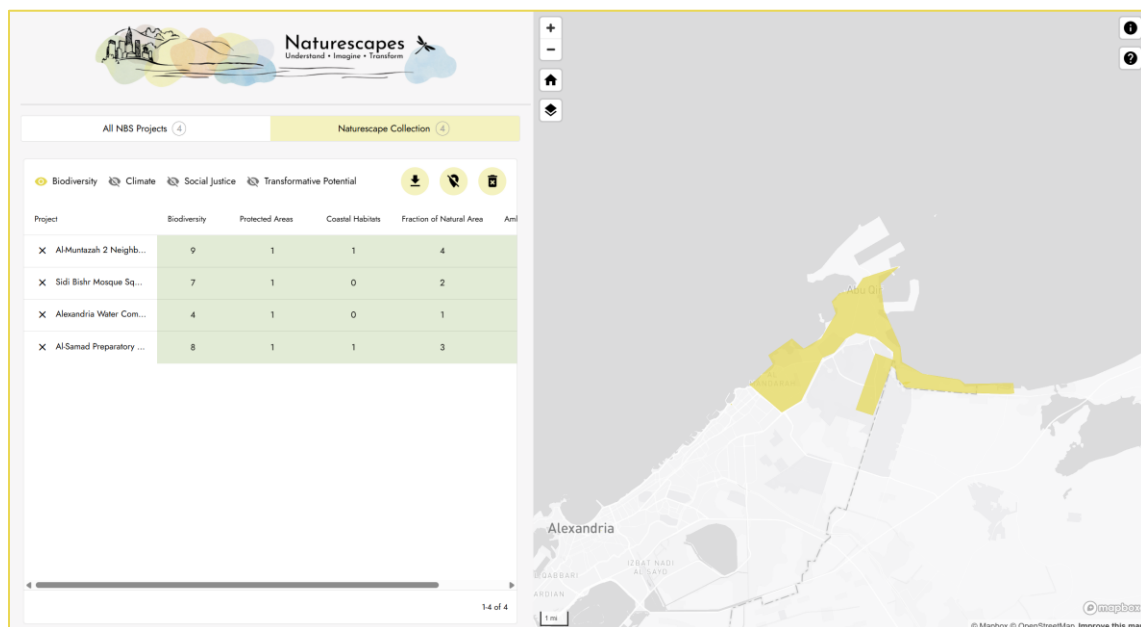

Figure 5: Naturescape Collection with biodiversity indicators and collection areas visible.

4. After the Naturescape Collection is complete, export by clicking the button.
